### About Our Institution:

Kings College of Engineering (KCE) is an institution which was formed with the single aim of providing quality education to the poor and under-privileged students of this region KCE has been started during 2001 and run by Raj Educational Trust (RET). KCE is approved by All India Council of Technical Education, New Delhi (AICTE) and is affiliated to the Anna University, Chennai. KCE has acquired ISO certification by TUV, Rheinland, Germany and Accredited by NBA, AICTE - India. Our institution offers 6 U.G Programmers and 4 P.G programmers. The college maintains high standard of education by providing a wide array of world class academic facilities, employing highly qualified and experienced faculty members and creating an ambience conducive of quality education. The institution is located at Thanjavur, a historical place of Tamil Nadu on the Thanjavur – Pudukottai Highway.

### About The Department:

The department was established in the year 2001. It has well qualified and experienced staff and it continually updates its laboratories with modern facilities. The Department imparts quality education to its students, in modern lecture rooms equipped with appropriate teaching aids. Due to quality academic standard of the Department, the students of the Electronics and Communication Engineering programme have been consistently performing well by organizing seminars,

conference and project expo regularly and also securing good marks in University examinations. Thus the result and the placement of the Department are increased every year. It offers a post graduate course viz M.E in VLSI Design.

### About the Workshop:

The workshop will influence on future research and development in Artificial intelligence and Expert systems. It will fuel inter-disciplinary collaborations between members of varied communities (e.g., Competitions and prizes, computing platform, Process Control, Scheduling & Planning, etc..). It will also educate the general public about the Artificial intelligence and Expert systems and the ways to prevent them. And we have a Practical session. It's fully about using NLTK tool kit this written in Python.
